Dated June 4, 2004

Non-Compliant Amdt. of May 17, 2004

**Amendments to the Claims:** 

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:** 

1. (Currently Amended) A packaging assembly for food products to be cooked or heated

in microwave ovens, which comprises:

an inner wrapper which contains the food product; , said inner wrapper capable of

transmitting heat or steam to

an outer package of plastic material which encloses said inner wrapper;

at least one layer of a heat-concentrating material; and

a substrate attached to an outer face of said outer package;

wherein said at least one layer of heat-concentrating material causes the opening of the outer

package by melting a portion of the outer package, and a portion of the outer package is melted to

permit removal of the inner wrapper from the outer package during heating of the assembly in a

microwave oven.

2. (Previously Presented) A packaging assembly as claimed in Claim 1, further

comprising a sheet of a heat-insulating material, attached to an inner part of the outer package.

3. (Previously Presented) A packaging assembly as claimed in Claim 1, wherein the

substrate is made up of a continuous web of flexible material, common to a plurality of said products

2

each including said outer package and said inner wrapper.

- 4. (Original) A packaging assembly as claimed in Claim 1, wherein the substrate is made up of a sheet of a size equal to or smaller than that of the outer package.
- (Original) A packaging assembly as claimed in Claim 1, wherein the substrate is made
  of paper.
- 6. (Previously Presented) A packaging assembly as claimed in Claim 1, wherein the inner wrapper comprises at least one area having two sheets of material, and wherein the layer of heat-concentrating material is inserted between said two sheets of material.
- 7. (Original) A packaging assembly as claimed in Claim 2, wherein the layer of heat-concentrating material is applied as a coating onto the sheet of insulating material.
- 8. (Original) A packaging assembly as claimed in Claim 1, wherein said heat-concentrating material is an oxide of aluminum.
- 9. (Original) A packaging assembly as claimed in claim 1, wherein the outer package is attached onto the substrate by means of an adhesive.
- 10. (Currently Amended) A packaging assembly as claimed in Claim [[1]] 2, wherein the sheet of insulating material is attached to the outer package by means of an adhesive.
- 11. (Original) A packaging assembly as claimed in claim 1, wherein the outer package is made of polyethylene and the inner wrapper is made of paper.
- 12. (Previously Presented) A packaging assembly as claimed in claim 1, wherein the outer package presents at least one weld-line of a predetermined strength, wherein said at least one weld-

line facilitates the opening of the outer package during heating.

13. (Previously Presented) A packaging assembly as claimed in claim 1, wherein said at least one layer of heat-concentrating material further comprises:

at least one strip of heat-concentrating material.

- 14. (Previously Presented) A packaging assembly as claimed in claim 1, wherein said at least one strip of heat-concentrating material is applied on said outer package.
- 15. (Currently Amended) A packaging assembly for food products to be cooked or heated in microwave ovens, which comprises:

an inner wrapper made of paper which contains the food product; ; said inner wrapper capable of transmitting heat or steam to

an outer package of plastic material which encloses said inner wrapper;

at least one layer of a heat-concentrating material; and

a substrate attached to an outer face of said outer package,

wherein said at least one layer of heat-concentrating material causes the opening of the outer package by melting a portion of the outer package, and a portion of the outer package is melted to permit removal of the inner wrapper from the outer package during heating of the assembly in a microwave oven.
